User groups (2) [Info](#)

A user group is a collection of IAM users. Use groups to specify permissions for a collection of users.

Filter User groups by property or group name and press enter

<input type="checkbox"/>	Group name	Users	Permissions	Creation time
<input type="checkbox"/>	Development	2	Defined	3 days ago
<input type="checkbox"/>	DevOps	2	Defined	3 days ago

Buttons: Create group, Delete

Development [Delete](#) [Edit](#)

Summary

User group name	Creation time	ARN
Development	September 23, 2021, 18:25 (UTC+02:00)	arn:aws:iam::669600377312:group/Development

Users | **Permissions** | **Access advisor**

Users in this group (2) [Info](#)

An IAM user is an entity that you create in AWS to represent the person or application that uses it to interact with AWS.

This page is used to test the proper operation of the Apache HTTP server after it has been installed. If you can read this page, it means that the Apache HTTP server installed at this site is working properly.

If you are a member of the general public:

The fact that you are seeing this page indicates that the website you just visited is either experiencing problems, or is undergoing routine maintenance.

If you would like to let the administrators of this website know that you've seen this page instead of the page you expected, you should send them e-mail. In general, mail sent to the name "webmaster" and directed to the website's domain should reach the appropriate person.

For example, if you experienced problems while visiting `www.example.com`, you should send e-mail to "webmaster@example.com".

If you are the website administrator:

You may now add content to the directory `/var/www/html/`. Note that until you do so, people visiting your website will see this page, and not your content. To prevent this page from ever being used, follow the instructions in the file `/etc/httpd/conf.d/welcome.conf`.

You are free to use the image below on web sites powered by the Apache HTTP Server:
